

I'M SO STRESSED OUT!

Is it stress or anxiety?

Stress

- Generally is a response to an *external* cause, such as taking a big test or arguing with a friend.
- Goes away once the situation is resolved.
- Can be positive or negative. For example, it may inspire you to meet a deadline, or it may cause you to lose sleep.

Both Stress and Anxiety

Both stress and anxiety can affect your mind and body. You may experience symptoms such as:

- Excessive worry
- Uneasiness
- Tension
- Headaches or body pain
- High blood pressure
- Loss of sleep

Anxiety

- Generally is *internal*, meaning it's your reaction to stress.
 - Usually involves a persistent feeling of apprehension or dread that doesn't go away, and that interferes with how you live your life.
- Is constant, even if there is no immediate threat.

Ways to Cope

- Keep a journal.
- Download an app with relaxation exercises.
- Exercise and eat healthy.
- Get regular sleep.
- Avoid excess caffeine.
- Identify and challenge your negative thoughts.
- Reach out to your friends or family.

Find Help

If you are struggling to cope, or the symptoms of your stress or anxiety begin to interfere with your everyday life, it may be time to talk to a professional. Find more information about getting help on the National Institute of Mental Health website at www.nimh.nih.gov/findhelp.
